

SUSTAINABLE AVIATION FUEL

AVAILABLE AT SFO AND LTN

REDUCING BUSINESS AVIATION'S CARBON FOOTPRINT

Through Signature Renew, our company-wide global sustainability initiative, we're invigorating the journey toward net-zero carbon emissions. We're proud to be the first FBO worldwide to offer a permanent supply of Sustainable Aviation Fuel (SAF) to business aviation to meet their emissions goals.

READY TO GO, READY TO FLY

Sustainable Aviation Fuel is ready for uplift at our San Francisco Int'l Airport (SFO) and London-Luton Airport (LTN) locations, giving customers a green option when purchasing Jet A. Every day we're uplifting thousands of gallons of SAF.

SAF HELPS THE ENVIRONMENT

Signature Renew SAF is an economical way to reduce aircraft carbon emissions by more than 25%. Certified for use in all jet aircraft, Signature Renew SAF is easy to use and the fastest way for operators to help meet their own sustainability goals.

COMPOSITION AND EFFICIENCY

- Contains 35% SAF blend, with flexible mix of raw materials, including waste, fats and vegetable oils
- Reduces introduction of ground-based carbon released from traditional fossil fuels
- Offers practical solution for aviation's goal of reducing 50% of greenhouse gas emissions by 2050

PERFORMANCE AND SAFETY

- Meets ASTM jet fuel specification, is identical to Jet A
- Has been in use for years in airliners, powering tens of thousands of hours of safe flying
- Supported by worldwide aviation's governing bodies as cleaner fuel alternative

ACCOUNTABILITY

- Reduces the need to purchase EU and CORSIA offsets
- Lets companies meet environmental sustainability goals
